SPA CHEMISTRY FOR BROMINE SYSTEM

*Please turn on spa pumps when adding chemicals to your spa.

EVERY USE

- Add 2oz of Renew before *use if there is a heavy bather load* (extra people)

EVERY WEEK

- Test water Chemistry (Bromine, Alkalinity, Ph, and Calcium Hardness)
- Add Spa Up *if Ph is Low* (low Ph is caustic and will attack materials in your spa)
- Add Spa Down *if Ph is High* (high Ph will cause calcium buildup on the heater and other parts)
- Add 1 Bromine Tablet per person into dispenser
- Add 2oz of Renew of Spa 56 (acts as an oxidizer which will remove dead bacteria)
- Add 2oz of Spa Defender (calcium inhibitor)
- Add 2oz of Enzyme (eliminates scum line in tub)

**If water is cloudy after 30 minutes add 1oz of Bright and Clear*

*Spray your filter with your hose every few weeks

EVERY DRAIN AND REFILL *(Recommended every 4-6 months)

- Add a full bottle of metal gon to new water
- Add 2oz packet of Sodium Bromide to new water

*Continue with the EVERY WEEK checklist

- Deep clean filter with filter clean
- Clean and treat cover, pillows, and synthetic cabinet with 303

OTHER

- Replace main filter every 18-24 months
- Replace micro-clean filter every 4-6 months (on select models)
- Replace Clear Ray bulb every 12 months (on select models)

We understand this may be a lot to remember. In order to better serve you, please check out our new iPhone application, **Hot Tub Assistant**, that helps you set reminders, store your shopping list, and more! Learn more at www.hottubassistant.com.
